You are authorizing them to act on your behalf and you will be responsible for any use of the Service by them (e.g., such as when you provide this information to a joint account holder, an employee, and/or an aggregation service provider).

If you believe that your password or other means to access your account has been lost or stolen or that someone may attempt to use the Service without your consent or has transferred money without your permission, you must notify us at once by calling (410) 827-8881 during customer service hours. We also recommend that you immediately log into the system and change your Online Banking password.

9. Account Balances

Balances shown in your accounts may include deposits subject to verification by us. The balance reflected may differ from your records due to deposits in progress, checks outstanding, or other withdrawals, payments or charges. A transfer request may not result in immediate availability because of the time required to process the request. A transfer request must be made before the Business Day cut-off time to be effective the same Business Day.

When changes are made to any fees, charges, or other material terms, we will update this Online Banking Agreement and notify you accordingly. Notification will be given at least thirty (30) days in advance of the effective date of any additional fees for online transactions, or of any stricter limits on the type, amount or frequency of transactions or any increase in your responsibility for unauthorized transactions, unless an immediate change is necessary to maintain the security of the system. If such a change is made, and it can be disclosed without jeopardizing the security of the system, we will provide notice to you within thirty (30) days after the change. We reserve the option, in our business judgment, to waive, reduce or reverse charges or fees in individual situations. If a hold has been placed on deposits made to an account from which you wish to transfer funds, you cannot transfer the portion of the funds held until the hold expires.

You cannot cancel a transfer after it has been entered into the system AND the information has been processed and/or transmitted to us; however, you can edit or delete a transfer prior to the business day cut off time.

We neither guarantee the delivery nor the accuracy of the contents of each Alert. You agree to not hold Queenstown Bank, its directors, officers, employees, agents and service providers liable for losses or damages, including attorneys' fees, that may arise, directly or indirectly, in whole or in part, from (a) a non-delivery, delayed delivery, or the misdirected delivery of an Alert; (b) inaccurate or incomplete content in an Alert; or (c) your reliance on or use of the information provided in an Alert for any purpose.

Alert Information. As Alerts delivered via SMS, email and push notifications are not encrypted, we will never include your passcode or full account number. You acknowledge and agree that Alerts may not be encrypted and may include your name and some information about your accounts, and anyone with access to your Alerts will be able to view the contents of these messages.

16. Security

Online Banking utilizes a comprehensive security strategy known as multifactor authentication to protect your accounts and transactions conducted over the Internet. Online Banking enrollment process will verify your identity by confirming information you provide with the information we have on file.

Usernames and Passwords - One of the main security features protecting Online Banking is the unique combination of your Username and Password. During the enrollment process, you will be asked to select a unique Username and choose a Password.

You determine your own Password, which is encrypted in our database. Neither this Institution nor its Service Providers have access to this information. Online Banking will automatically deactivate your account after three unsuccessful login attempts within a 20-minute time frame. You may reset your password online or you may contact this Institution for assistance.

Because your Password is used to access your accounts, you should treat it as you would any other sensitive personal data.

- You should carefully select a Password that is hard to guess.
- You should not use words based on your name, address or other personal information.
- Keep your Password safe.
- Memorize your Password and do NOT write it down.
- You will be required to change your Password every 365 days.
- Your Password should be changed immediately if you suspect that it has been compromised. This can be done at any time from the "Options" menu after you log on to Online Banking.

Neither this Institution nor its Service Providers will contact you via telephone or email requesting personal information, your Username, or your Password. If you are contacted by anyone requesting this information, please contact us immediately.

User Authentication – Your computer is registered with unique identifiers using secure cookies and Adobe® Flash® shared objects to identify your computer and your IP address, and other information to verify your identity. This prevents criminals from logging into your account even if they possess your unique Username and password. If your computer is not recognized, the system will require that a security question that was established during your first login be answered correctly prior to continuing.

Encryption – Online Banking uses the Transport Layer Security (TLS) encryption technology for everything you do while using Internet banking. Your browser automatically activates this technology when it attempts to connect to our Service. The Service requires a browser that supports 128-bit encryption. The Service will warn you if your browser does not meet this requirement. What this means to you is that your communications are scrambled from your browser to our servers at all times so no unauthorized party can read the information as it is carried over the Internet.

Mutual Authentication - In addition to encryption, Username and password, an extended validation (EV) certificate that is in place will populate the browser address bar with a lock icon, providing customers with visual confirmation that they are on a valid website. This provides end to end protection against phishing, spoofing, keyboard logging and other fraudulent attacks without the need for installing new software. EV SSL provides an extra layer of protection for consumers and website operators by requiring third-party Certificate Authorities (CA) to follow a strict issuance and management process, as defined by the CA/Browser Forum, for certificate approval and delivery. The user can also opt to use a variety of security challenge questions when logging in to ensure security.

Cookies - During your use of Online Banking, our Internet banking Service Provider will pass an encrypted *cookie* to your computer in order to identify your computer during the session. The encrypted cookie registers your computer with Online Banking and your computer will be recognized during future logins. This cookie enables us to process multiple transactions during the session without having to provide a Username and Password for each individual transaction. This cookie does not contain any personal information; it simply provides another level of security for our Internet banking product. The cookie is stored on your computer's hard-drive, identifying your computer while you are logged on. When you log off, close your browser, or turn off your machine, the cookie will be destroyed. A new cookie is used for each session; thus, no one can use the prior cookie to access your account.

RSA's Adaptive Authentication Technology – During your use of Online Banking, our Internet banking Service Provider will be taking steps to keep your personal information safe and secure with an enhanced Multi Factor Authentication method known as **Complex Device Identification**. The CDI technology is a risk based approach to enabling strong, multifactor authentication device forensics and behavioral analysis technology which is used to identify and register your computer with Online Banking, and will allow your computer to be recognized during future logins. CDI enables us to process multiple transactions during the session without having to provide a Username and Password for each individual transaction. What this means is when you login to the Online Banking system the following data elements will be used to recognize your computer: IP Address, User-agent string, User screen information, Software plug-in, Current time, Language, Java, Cookies.

Additional Security Guidelines:

- All Authorized Users should sign-off after every session; however, online sessions will automatically end after fifteen (15) minutes of inactivity. This is to protect you in case you accidentally leave your computer unattended after you log-in.
- The security of public computers (e.g. in a library, or Internet café) cannot be assured; therefore we recommend that you refrain from accessing the Service on a public computer.
- Routinely scan your computer, servers, and electronic media using reliable virus detection and anti-spyware products. Undetected or un-repaired viruses or spyware may affect the performance of your computer, corrupt and destroy your programs, files, and even your hardware. Additionally, you may unintentionally transmit sensitive data to another third party or transmit a virus to other computers.
- Use a firewall product (hardware and/or software), especially if you have a broadband Internet connection such as DSL or cable modem.

- Keep your computer's operating system and browser fully patched for critical security issues. We recommend use of the most current, fully patched, versions of Internet browsers for accessing Online Banking.

ADDITIONAL PROVISIONS

1. **Bank Liability**

We will use commercially reasonable efforts to make all your transfers and Bill Payments properly. However, we shall incur no liability and any Bill Payment Service Guarantee shall be void if we are unable to complete any transactions initiated by you because of the existence of any one or more of the following circumstances:

- Your Eligible Account(s), including either your Payment Account or Billing Account, is closed;
- If your computer, software, telecommunication lines were not working properly and this problem should have been apparent to you when you attempted the transfer or Bill Payment;
- It can be shown that the Biller received the Bill Payment within the normal delivery timeframe and failed to process the payment through no fault of ours;
- The payment or transaction request involves funds subject to hold, dispute, restriction, or legal process we believe prevents their withdrawal;
- We have reason to believe that a payment or other transaction request may not be authorized by you or any third party whose authorization we believe is necessary; and/or
- Circumstances beyond control of the Service, our Service Providers, and this Institution (such as, but not limited to, fire, flood, or interference from an outside force) prevent the proper execution of the transaction and we have taken reasonable precautions to avoid those circumstances.

Provided none of the foregoing exceptions are applicable, Online Banking causes an incorrect amount of funds to be removed from any of your linked Account(s) or causes funds from your Payment Account to be directed to a Biller, which does not comply with your Payment Instructions, this Financial Institution and/or its Service Providers shall be responsible for returning the improperly transferred funds to your Payment Account, and for directing to the proper Biller any previously misdirected transactions, and, if applicable, for any late payment related charges.
